    <h3>Project 2</h3>
    
    <p>The project is a food management application that aims to reduce food waste at the household level, thereby minimizing environmental impact. The application also aims to encourage mindful consumption and prevent overbuying, saving money on groceries. Additionally, the application promotes food donation and resource utilization, supporting communities in need. These goals are achieved through the design of the user interface (UI) and user experience (UX) of the application. Through good design and a seamless user experience, individuals are empowered to actively combat food waste and contribute to creating a more sustainable future.</p>

Osama Al-Malki

Objectives

I am a highly motivated and detail-oriented student software engineer with a strong academic record and a passion for developing innovative software solutions. I am seeking an entry-level software engineering position where I can use my skills and knowledge to contribute to a team and learn from experienced professionals.

Education

Bachelor's Degree in Software Engineering - University of Jeddah

Courses: Web Development, Database Management, Software Engineering Principles

Certificates: HTML5, CSS3, JavaScript

Projects

Project 1

The project is a modern real estate office management website that aims to facilitate the process of buying and selling properties for customers and real estate office owners. The website allows customers to access a wide database of real estate offices and their available offers. Additionally, it provides customized features for real estate office owners to attract more customers and increase profits. The project also aims to develop a modern system that replaces traditional
